Victoria,

These are the open issues from our meeting last month.

1. We have signed up for the Waste Generator Workshop Dec 15th.
2. We have completed the attached waste determination document for your review.
3. Two 55 gallons containers: weight of the containers combine 224 lbs. Subtract the empty weight and there is 144 lbs of waste accumulated over 7 months = average of 20.57 lbs of waste per month. Currently there is D001 and unregulated waste in the barrels.
4. We haven't had any florescent lights to throw away, but Safety Kleen will pick them up.
5. Corrugate Recycling - Average 20462 lbs. a month, picked up about once a month. Smurfit Recycling 510 Division St. KCKS
6. General Trash - Compactor: 34 yarder (20ft x 8ft) Picked up when called, called twice since May. Waste Management 3611 NW 16th Topeka, KS

I am sure you will let me know if I missed something.

Happy Holidays,

KEN RICHARDSON
